空气污染

1) 种树

例题: What is the most important action for the government to take for the protection of environmental problems?

- 1.fund researches on new energy sources such as solar and wind power;
- 2.protect forests and natural wildlife species.
- 3.pass and enforce laws to reduce the pollution

种树 -> 减少空气污染

Planting trees will help the government solve environmental problems. In detail, the more trees are planted under the regulations of the authority, the more oxygen will be released, which improves the quality of air; in contrast, researching and exploiting new energy sources release pollutants and worsen air quality.

2) 交通

例题: What is the most important action for the government to take for the protection of environmental problems?

- 1.fund researches on new energy sources such as solar and wind power;
- 2.protect forests and natural wildlife species.
- 3.pass and enforce laws to reduce the pollution

交通 -> 减少空气污染

It is regulations on cars that promote the quality of air. To be more specific, under the strict requirements of the government on vehicles, not only will automobile companies manufacture eco-friendly cars, but also people will reduce their dependence on automobiles; on the other hand, never can we ignore the fact that to research new energy sources, numerous materials will be burned, which brings a large quantity of exhausts.

水质污染

1) 农业

例题: What is the most important action for the government to take for the protection of environmental problems?

- 1.fund researches on new energy sources such as solar and wind power;
- 2.protect forests and natural wildlife species.
- 3.pass and enforce laws to reduce the pollution

农业 -> 减少水污染

Laws on the use of fertilizers should be issued so as to improve water quality. Specifically, it is forbidding the abuse of fertilizers that reduces the chemicals washed into water systems, and improves the quality of water; on the contrary, chemicals and other wastes will not be decreased when the government protects wildlife species.

2) 工厂

例题: What is the most important action for the government to take for the protection of environmental problems?

- 1.fund researches on new energy sources such as solar and wind power;
- 2.protect forests and natural wildlife species.
- 3.pass and enforce laws to reduce the pollution

工厂 -> 减少水污染

Preventing companies from releasing wastes will better water quality. Specifically, only under strict rules on water protection will companies introduce new equipment to research water wastes and adopt certain measures to purify them; however, it is impossible for the authority to deal with water pollution and reduce numerous water wastes by protecting forests.
